AMENDMENTS TO THE SPECIFICATION:

Please amend paragraph [0026] in the originally filed specification as follows:

In preferred embodiments of the present invention, when the density of the electrodes, the thickness of the electrodes, and the wavelength of a boundary acoustic wave are represented by ρ (kg/m^3), H/λ , and λ , respectively, it is preferable that $H/\lambda > 8261.744\rho^{-1.376}$ be satisfied. In addition, it is more preferable that $\rho > 3,745 \text{ kg}/\text{m}^3$ be satisfied. Furthermore, it is even more preferable that

$33,000.39050\rho^{-1.50232} < H/\lambda < 88,818.90913\rho^{-1.54998}$ be satisfied.
